

BECOMING CLIMATE NEUTRAL ACROSS THE WHOLE VALUE CHAIN – THE CASE OF SPECIALTY CHEMICALS COMPANY LANXESS

Krueger R.

LANXESS Central Eastern Europe s.r.o., Bratislava, Slovakia

Fighting climate change is the greatest challenge of our time. LANXESS has committed to play its part in limiting global warming by less than 1.5 degrees celsius. The specialty chemicals company has therefore outlined a plan to become climate neutral by 2040 within its operations and energy sourced. In addition, LANXESS just recently enhanced its ambition and committed to bring emissions along its entire up- and downstream value chain to net zero. The presentation addresses achievements, future plans, challenges and opportunities of this company wide program.
